

CLUB VELVET

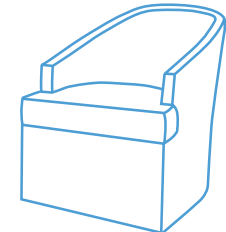

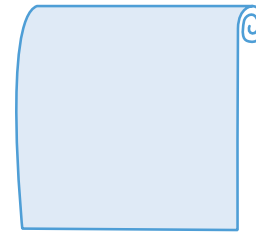

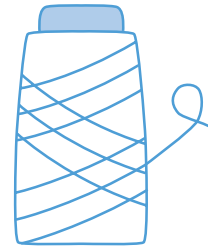

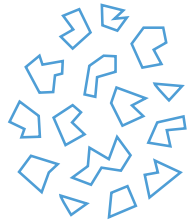

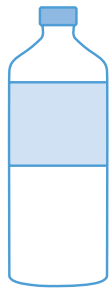

SUSTAINABILITY

Over **600 billion** plastic bottles are discarded every year, worldwide.
We're taking a step to be part of the **sustainable solution**.

Nearly **400,000** recycled, post-consumer plastic bottles (PET) are used to produce this collection.

17 plastic bottles are woven in every **1 yard of fabric**.

Thibaut is turning single-use bottles into high-quality, long-lasting fabrics that are made to be enjoyed for years. We are proud of this reuse story.

Recycled plastic bottles are collected from consumer venues and recycling centers.

Technology transforms plastic bottles into PET flakes.

PET flakes are converted into 100% sustainable polyester yarns.

High-quality, filament yarns are woven to create a beautiful, low pile, casual velvet.

Once upholstered, homeowners enjoy a durable velvet that is washable and lightfast.

PERFORMANCE

LONG-LASTING DURABILITY

- Meets ACT standards for High Traffic/Heavy Duty
- 45,000 Wyzenbeek double rubs
- Passes NFPA 260, Cal TB 117 & UFAC-Class 1

LIGHTFASTNESS Exceeds indoor standards at 400 hours

CLEANABILITY Soap & water, solvents or diluted bleach

MACHINE WASH Delicate cycle, air dry only

EASY TO CLEAN Most light or medium stains can be spot cleaned with Dawn® or Fantastik® and water. Rinse well as soap residue attracts dirt. *Some stubborn stains may not be completely removable.*

Thibaut is proud to partner with Ocean Blue Project

- Thibaut will donate one dollar to Ocean Blue Project for every yard of Club Velvet sold, to support their microplastic recovery efforts.
- For every dollar Thibaut donates, Ocean Blue Project will recover 5 pounds of microplastics from our beaches, ocean, and waterways.

DID YOU KNOW?

- 55% of waterways in America are in poor condition. If nothing changes, there will be more plastic in the ocean than fish by 2050.
- Over 5 trillion macro and microplastics are afloat in our oceans.
- At least 800 species worldwide are affected by marine debris, and as much as 80% of that litter is plastic.

HOW CAN YOU HELP?

Join Ocean Blue in a task as vast, critical, and inspiring as the ocean itself. Founded in Oregon in 2012, their mission is to protect and conserve the ocean and its associated waterways through hands-on volunteer efforts, service-learning programs, and microplastic recovery programs. To learn more, visit oceanblueproject.org.

Together, we'll make a difference and we're just getting started.
