

Over **600 billion** plastic bottles are discarded every year, worldwide.
We are transforming “waste” into something beautiful.

Recycled plastic bottles are collected from consumer venues and recycling centers.

Technology transforms plastic bottles into PET flakes.

PET flakes are converted into 100% sustainable polyester yarns.

High-quality, filament yarns are woven to create a beautiful, low pile, casual velvet.

Once upholstered, homeowners enjoy a durable velvet that is washable and lightfast.

We're taking a step to be part of the sustainable solution.

Here's what you need to know:

- Nearly **400,000** recycled, post-consumer plastic bottles (PET) are used to produce this collection. **17 plastic bottles** are woven in every **1 yard of fabric**.
- Thibaut is turning single-use bottles into high-quality, long-lasting fabrics that are made to be enjoyed for years. We are proud of this reuse story.

PET (Polyethylene Terephthalate) single-use plastic bottles are one of the most commonly used items in our daily lives. Having good collection, recycling & reuse programs, and smart technology that extends the life of the original plastic, is crucial to reduce negative environmental impact.

Thibaut is proud to partner with Ocean Blue Project

- Thibaut will donate one dollar to Ocean Blue Project for every yard of Club Velvet sold, to support their microplastic recovery efforts.
- For every dollar Thibaut donates, Ocean Blue Project will recover one pound of microplastics from our beaches, ocean, and waterways.

DID YOU KNOW?

- 55% of waterways in America are in poor condition. If nothing changes, there will be more plastic in the ocean than fish by 2050.
- Over 5 trillion macro and microplastics are afloat in our oceans.
- At least 800 species worldwide are affected by marine debris, and as much as 80% of that litter is plastic.

HOW CAN YOU HELP?

Join Ocean Blue in a task as vast, critical, and inspiring as the ocean itself. Founded in Oregon in 2012, their mission is to protect and conserve the ocean and its associated waterways through hands-on volunteer efforts, service-learning programs, and microplastic recovery programs. To learn more, visit oceanblueproject.org.

Together, we'll make a difference and we're just getting started.

THIBAUT
