

General Information

Atmosphere is a collection of wide width sheers for drapery usage and are not recommended for upholstery. As is expected of this type of fabric, sheers are delicate and need to be handled as such. This collection includes a selection of Indoor/Outdoor sheer fabrics which are found at the back of the book indicated by a tabbed section. The fabrics in Atmosphere are varied in content. Please pay close attention to the care and cleaning of these fabrics as they differ from pattern to pattern.

All of the fabrics in this collection are railroaded. The widths (lengths when railroaded) vary from 107" to 123". The width of the fabric will indicate the maximum length of the draperies after allowing for hemming and top treatment.

Check fabric for proper design and color. Even though all fabric is inspected, final assessment and approval of fabric before installation is the responsibility of the customer. If a fabric is being shipped directly to a workroom, please provide the workroom with a sample of the correct material. Thibaut is not responsible for labor costs in the converting of incorrect or imperfect material.

Dyelots may vary with each production. You may request cuttings for approval (CFA) before ordering. Order carefully as fabrics are not returnable for credit.

All fabric orders are processed and shipped F.O.B. Charlotte, NC. This collection is designed exclusively by Thibaut.

Care & Cleaning of Atmosphere Wide Width Sheers
