View the World from Every Angle in Thibaut's Geometric Resource Volume 2

Newark, NJ -- Thibaut continues to embrace the leading graphic trend with **Geometric Resource Volume 2**. Complementing the existing family of geometrics, this new collection of wallpaper encompasses fun and lively patterns that range from modern trellises to simulated studs and animal prints. Special techniques such as flock, beads and printed grasscloth are combined with clean and textural printing methods. Color offerings range from a heavy supply of neutrals to fresh and bright, satisfying palettes.

Kendall is a delicate scrolling pattern with a lot of impact. The small, metallic dot detail enhances the scrolls on the strong colored grounds like rich orange, navy, green and soft pastels.

A great mid-size scale named after the occupation for a gate keeper, **Portier** is a fitting name for this fretwork pattern. The flock technique was used to soften the edges of this sharp pattern, while the glass beads enhance the pattern in a glamorous way.

Meaning "arching curve," **Camber** is a simple ogee pattern that has a flat and clean look. The large, open-layout makes it fitting for large rooms.

Created to simulate the studs or brads used on furniture, **Brad** is a simple trellis layout that makes a great stand alone pattern.

The graphic silhouette of the butterflies in **Aldora** are softened with a printed linen texture. This wallpaper was designed to be the perfect bathroom or girls' bedroom wallpaper.

Javan was named after an endangered leopard species. Natural shapes like animal prints combine well with other geometrics or free flowing patterns. The surface print technique enhances the texture and softens the overall appearance of this pattern.

Nevio is an all-over dot pattern whose all-over dot pattern has soft edges that are almost hand drawn. The simple geometric layout makes a great backdrop pattern.

Taken from a classic Mediterranean tile shape, all colorways of **Nisido Bead** are neutrals and pearls with a hint of sparkle. Larger in scale, **Cortney** carries the same classic shapes and is printed on top of fine sisal.

WALLPAPER FABRIC FURNITURE

Farris is the wallpaper version of Nexus from the Companions woven collection. Printed on paper-backed vinyl and embossed with a light linen texture for tactile finish. A delicate and small-scale geometric that becomes the backdrop in large space but shines in a small room.

Gilon, which means "circle," was inspired by an antique fabric. The interlocking circles make for a softer, rounder geometric pattern. The surface printing of white on bright colors makes this pattern feel fresh in all colorways.

Taken from an old Thibaut pattern updated from the 1970s, the shadow effect gives **Turner** depth and dimension to make this pattern bold, impactful, intricate and interesting.

Geometric Resource Volume 2 and other Thibaut collections are available through interior designers and fine decorating stores worldwide. Founded in 1886, Thibaut is the oldest continuously operating wallpaper company in the United States. Known for its exceptional and unique designs, the company distinguishes itself from its competitors with inspiring color palettes, fresh interpretations of classic designs, and exclusive artwork created by an in-house design team. Design styles range from historic reproductions, toile, and chinoiserie to tropical and novelty patterns. Designers and consumers have been attracted to the firm's creative designs that "push the envelope," their exclusive print fabrics, new woven fabric lines, and their market-tested products that help inspire people to decorate. For more information about Thibaut, visit the company's web site at www.thibautdesign.com.
